

Launch Mission Execution Forecast

Mission: Falcon 9 Dragon CRS-26

Issued: 21 November 2022 / 1000L (1500Z)

Valid: 22 November 2022 / 1549-1559L (2049-2059Z)

Forecast Discussion: Cloudy conditions remain across the Spaceport today with easterly winds and isolated showers. On Tuesday, a wave is likely to form in the vicinity of Florida, adding a threat of thunderstorms and increasing the depth of the clouds. The primary launch weather concerns are the Thick Cloud Layers Rule, the Cumulus Cloud Rule, and Flight Through Precipitation.

Probability of Violating Weather Constraints ¹

Additional Risk Criteria ²																															
Notes	<ol style="list-style-type: none"> The Probability of Violation (PoV) is the chance of a local safety or customer constraint violation occurring anytime during the launch window. Additional Risk Criteria, which are not included in the PoV, are mission-specific constraints that may not include all phenomena within each risk factor. See https://www.patrick.spaceforce.mil/Portals/14/Weather/LaunchFAQ.pdf for more information
